GIOPATO & COOMBES

**Back to the magic of acrobats.
Looking up, immersed in the
darkness gazing at their infinite
vaults. They draw circles and
luminous pirouettes in the air, as
shapes that naturally and
effortlessly combine together.**

This collection recalls that magic movement with its slender thread-like structures in brushed brass, which change shape to create infinite geometric compositions.

Each capsule is crafted with a lathe using a very refined technique. It conceals light guides used in the automotive sector that make it possible to connect the LEDs contained in the ends of the capsule, conducting the light along the entire length. The light effect is clean, refined, and soft.

A single orbit movement, with Cirque Ellipse. Brass stems and two ribbed borosilicate transparent glass elongated capsules that project continuous light.
