

Softspot Wall

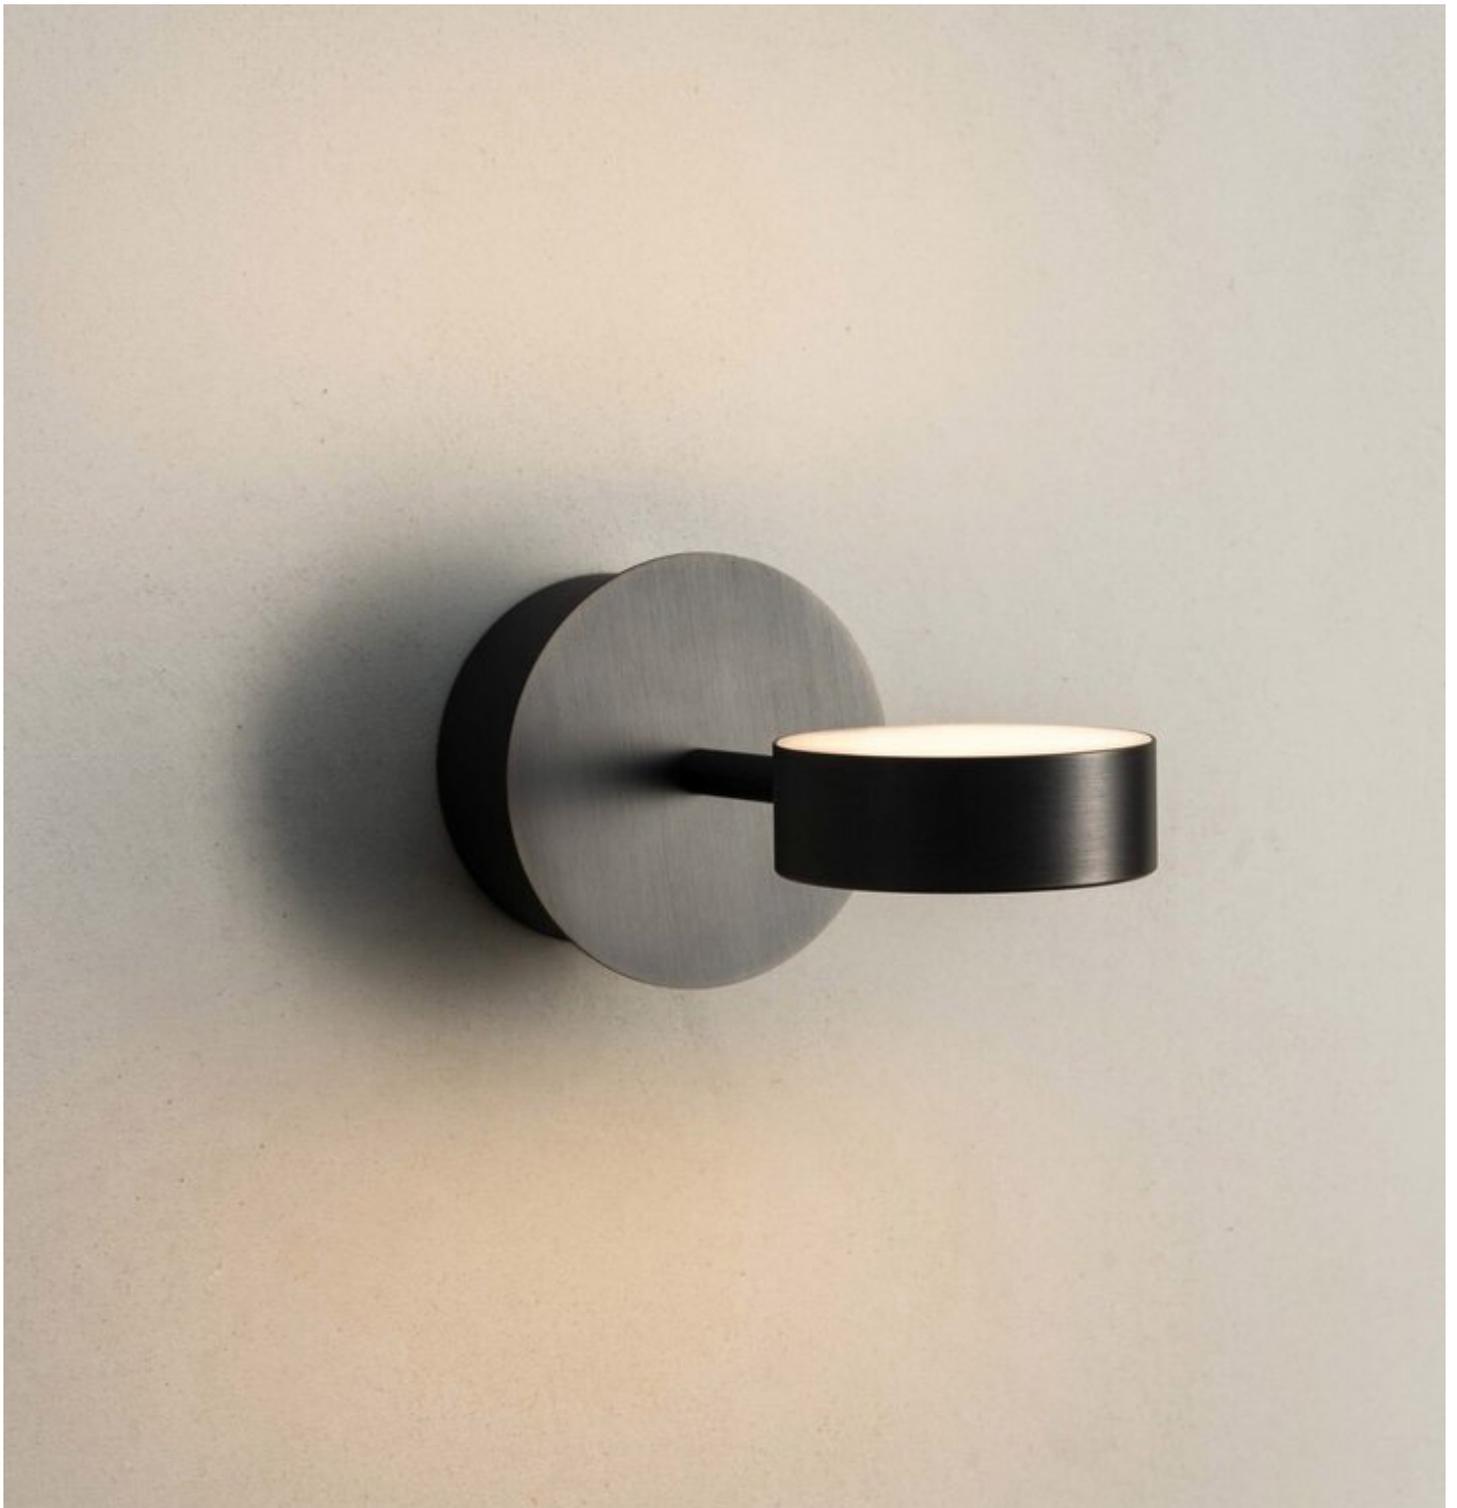

SALESHEET

Essential shape and structured details. Softspot collection condenses extreme attention to detail and lighting research.

The minimal exterior encloses a complex internal architecture, like the perfect precision of clockwork. Mechanical attention, invisible details, and compositional purity.

It emits light downwards to focus attention on the space below and upwards as indirect lighting, while the light emission is blocked horizontally to reduce glare

Hand-finished brass in different metal finishes, and light. An element of pure minimalism. A proprietary light source with its peculiar double-lighting structure.

MATERIALS

HAND FINISHED OR ELECTROPLATED
BRASS.
